Capability Statement

About us

RUGENDYKE & BASHFORTH CONTRACTING (RBC) ARE A DIVERSE EARTHMOVING AND CIVIL CONTRACTING COMPANY BASED IN LISMORE IN NORTHERN NSW.

Providing outstanding service, RBC have developed a broad client base - local and state government authorities, nationally recognised construction companies, large publicly listed agricultural firms, smaller local landholders and primary industries.

We have successfully developed relationships within both the private and public sectors and have a proven history of delivering a wide array of projects safely, innovatively and on time.

The RBC team understands the earthmoving and civil construction industries.

The RBC Difference

1 OUR MULTI-SKILLED, EXPERIENCED OPERATORS

Our people have an extensive knowledge of the earthmoving industry from the different soil types and the methods best used to manage them during construction, to our unique weather patterns and the effects that our weather can have on earthworks structures.

2 OUR FIRST CLASS MACHINERY

Rugendyke and Bashforth use our own late model, low hour earthmoving machinery in addition to cross hired plant and a reliable network of owner-operators and sub-contractors. This ensures that whatever your project requires we are able to resource it with the best machinery for the job.

Our strict preventative maintenance program ensures that our machinery is always available when needed.

3 OUR REPUTATION FOR EXCELLENT SERVICE

Rugendyke and Bashforth live and breathe earthmoving and civil construction. We do what we say we are going to do, when we say we are going to do it. This is the reason we have been able to gradually grow our business on a platform of repeat work opportunities and strong client relationships.

RBC'S PLANT LIST

Services

EARTHMOVING AND PLANT HIRE

Rugendyke and Bashforth Contracting provide obligation free quotes for small and large earthmoving projects. We can also assist in the procurement of any necessary permits and approvals.

We offer hourly hire or contract (quoted) prices for best practice construction of:

- Driveways and access tracks (gravel or sealed)
- House and shed pads, including sourcing or disposal of clean material as required
- Horse arena pads, including supply and delivery of coarse sands as required
- Drain cleaning and formation
- Dam wall repairs
- Dam design and construction

CIVIL CONSTRUCTION

Rugendyke and Bashforth Contracting provide obligation free quotes and advice in the scoping and planning stages of small and mid-sized civil construction projects.

We have the ability to formulate all necessary management plans for the safe undertaking of works. While our management systems are not third party accredited at this time, all our management plans reference best practice ISO 9001.

We offer hourly hire or contract (quoted) prices for best practice construction of:

- Small to mid-sized subdivisions (rural and residential)
- Carpark pavements, including seal
- Retaining wall construction
- Underground service conduit installation
- Footpath and bike path construction
- Stormwater, mains water and sewerage reticulation
- Bed level (causeway) construction

CONSERVATION EARTHWORKS

Rugendyke and Bashforth Contracting provide obligation free quotes and advice in the scoping and planning stages of all conservation earthworks projects.

We have the ability to design, manage and construct all manner of conservation projects including:

- Riparian repair works
- Erosion repair (gully shaping and filling), including erosion around underground services
- Design and construction of drop structures
- Fire trail maintenance
- Causeway repair / removal / replacement
- Rock revetment construction and maintenance
- Beach skimming and dune replenishment
- Minor contaminated site remediation
- Dam and water storage design and construction
- Design and construction of access tracks

We pride ourselves on attention to detail, highest safety standards and outstanding customer service.

Project History

**THROUGH OUR KNOWLEDGE
AND VAST EXPERIENCE,
RUGENDYKE & BASHFORTH
KNOW THE COSTS INVOLVED IN
EACH INDIVIDUAL PROJECT AND
THE RISKS THAT COME WITH IT.**

We provide open and honest communication from the initial contact, through the entire delivery phase, and after the completion of our work.

Our expertise flows right through to our long-standing relationships with other industry professionals to ensure that jobs, whether large or small, are completed on time and within budget. Our multi-skilled operators are highly experienced and proficient professionals.

MAJOR PROJECTS COMPLETED

Nymboida Tunnel Failure – Goolang Creek Remediation 2014

Client: NSW Soil Conservation Service

Project Value: \$1,200,000.00

Scope: Provision of plant and skilled operators to undertake the remediation of Goolang Creek and the Nymboida Canoe Centre post 2011 Flood Event

Urunga Antimony Processing Plant Remediation 2015-2016

Client: NSW Soil Conservation Service

Project Value: \$9,000,000.00

Scope: Provision of plant, skilled operators and project supervision for the remediation of the Urunga Antimony Processing Plant and Tailings Plume including construction of 30ML Mono Cell, excavation and treatment of 35,000 m3 of contaminated tailing and capping of treated materials.

Strathalbyn Station Gully Remediation Project 2018 -2019

Client: Greening Australia

Project Value: \$ 1,900,000.00

Scope: Contract works to undertake 65,000m3 of bulk earthworks, soil amelioration and capping works of the Strathalbyn Gully Complex.

Boombera Macadamia Orchard Development 2017-2019

Client: Arrow Primary Industry Fund

Project Value: \$4,500,000.00

Scope: Provision of all earthmoving and plant hire services for the development of the largest macadamia orchard in the Southern Hemisphere. The project included commissioning and development of on-site quarry, construction of over 30km of internal roads, construction of 160ML of harvestable rights storage (in excess of 75,000 m3 of bulk earthworks) and construction of 400ML of Off Stream Water Storages (165,000m3 of bulk earthworks).

Policies & Procedures

The health and safety of all our employees, sub-contractors and the community are of equal importance to all our operational considerations inclusive of our quality delivery and environment management. Rugendyke and Bashforth Contracting works collectively with every person onsite to ensure a safe workplace for all, whilst complying to the Health & Safety Act and Regulations.

We rank at the top of our daily business activity the importance of health, safety and welfare on our work sites.

Rugendyke and Bashforth Contracting has engaged a very well respected Health, Safety, Quality and Environment specialist to create our internal documentation and systems and to ensure we are kept up to date on an ongoing basis in regards to health, safety, quality, and environment management.

That specialist is Smarter Safety and an overview of who they are and what they supply can be seen here.

The Integrated Management System Smarter Safety has implemented into our business structure is 100% compliant to...

- Federal Work Health & Safety Act and Regulations - 01-01-2012
- Safety Management System - AS4801:2001
- Safety Management System - ISO 45001
- Quality Management System - AS/NZS ISO 9001:2016
- Enviro Management System - AS/NZS ISO 14001:2016

We also utilise the Smarter Safety ongoing Support Program to ensure our documentation is always up to date on our Smarter Safety SmarterScreen where it all is accessible 24/7 from our mobile devices inclusive of our integrated electronic forms which deliver the highest standard of compliance. All our Integrated Management System documentation is online and accessible at any time including...

- Mobile Powered Plant Risk Assessments
- Management System Overview
- Safety Data Sheets
- Induction Booklets
- Emergency Contacts
- Management Policies & Quality Procedures
- OHS/WHS Procedures
- Environment Procedures
- System Forms - both hard copy & electronic
- Safe Work Method Statements

Rugendyke and Bashforth Contracting is committed to making our work sites as safe as is humanly possible and we look forward to safely working together with you on your next project.

RBC IS A MEMBER OF THE NSW CIVIL CONTRACTORS FEDERATION

Testimonials

“

One of the things we valued most working with RBC was the ownership that Jason and Adam took over, not only the direct area of their work, but also in the overall success of the project. They took great pride in the quality of their work, but also took care to ensure their impact on the environment was minimised. We look forward to continue working with them and their team at Boombera Park.

Stuart Pettigrew, Project Manager, Arrow Funds Management Ltd

“

On all occasions we have found RBC to be efficient and reliable, supplying skilled operators, modern and well serviced equipment that is fit for task without fail. RBC have grown and developed as a company while not losing sight of customer service, quality and safety ideals.

Peter Menzies - Northern Area Manager, Soil Conservation Service

“

The scale of this work [building 5 new dams] meant that an expanded team would be required, and RBC was able to bring together a wide range of sub-contractors to complement their own team as well as coordinate well with our external hydrology engineer. All of the sub-contractors engaged were of a high standard, and having RBC manage the entire construction team made my role as Project Manager much easier.

Stuart Pettigrew, Project Manager, Arrow Funds Management Ltd
